

Every Wednesday, **From 09:00 to 10:00 AM**
Paul Ehrlich Hörsaal, Charité
Campus Mitte, Virchowweg 4, 10117 Berlin

Systems Biology Lectures in Development

Date	Speaker	Topics
10 April 2013	Stefan Mundlos, Charité	Exploring <i>cis</i> -regulatory networks in human disorders of development
24 April 2013	Uwe Ohler, BIMSB	Detecting <i>cis</i> -regulatory control regions by computational approaches
08 May 2013	Carmen Birchmeier, MDC	The role of <i>Insm1</i> in development and maintenance of endocrine cells
15 May 2013	Ferdinand le Noble, MDC	Vascular patterning in health and disease
22 May 2013	Silke Sperling, MPI Molgen - MDC - Charité	Role of transcription factors and histone modifications in cardiac development and function
29 May 2013	Mathias Treier, MDC	Balancing self-renewal with differentiation in embryonic stem cells
05 June 2013	Norbert Hübner, MDC	Title to be confirmed
19 June 2013	Mike Levine, UC Berkeley	Mechanisms of transcriptional precision and timing in the <i>Drosophila</i> embryo
26 June 2013	Nikolaus Rajewsky, BIMSB	Gene regulation of the fertilized embryo and the early life of animals
03 July 2013	Robert Zinzen, BIMSB	Of transcription factors and epigenomics: tissue specific control of gene expression in development
17 July 2013	Baris Tursun, BIMSB	Direct reprogramming – a shortcut in development?
